Introducing the IPPC Plant Health Campus

A global learning hub for strengthening phytosanitary capacity

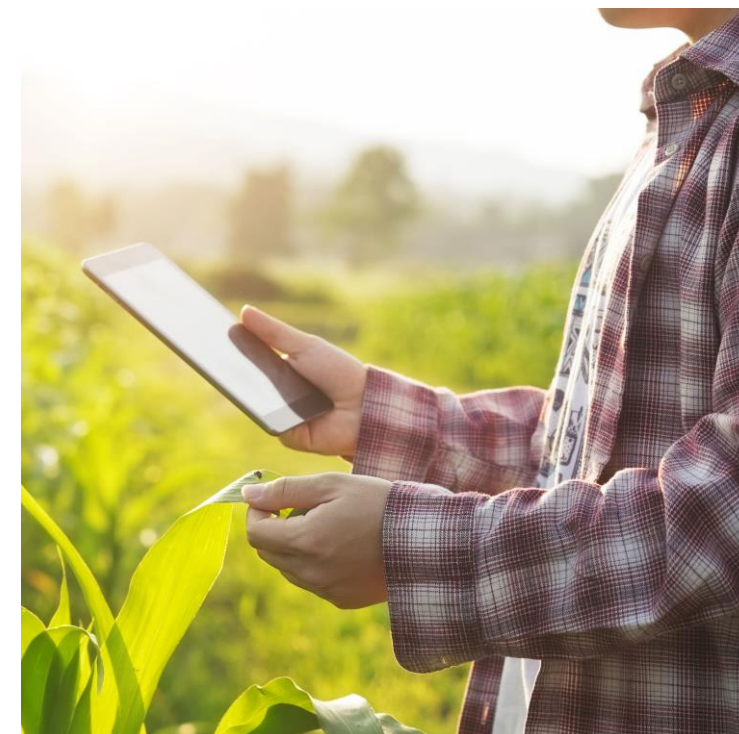

Sarah BRUNEL, Implementation and Facilitation Team Lead

IPPC Plant Health Campus – a key milestone in plant health capacity development

Developed with the FAO elearning Academy and thanks to support from the European Union

- Convenient one-stop portal to all IPPC e-learning courses, and IPPC guides and other training materials
- Free, certified e-learning courses
- Developed with technical support from global plant health experts
- Downloadable materials, available anytime, anywhere!
- Better knowledge = better compliance and **stronger biosecurity**
- Available in English and French!

IPPC PLANT HEALTH CAMPUS

Growing the skills of the global plant health community

Home International Plant Protection Convention NPPO management Communication & partnerships Pest risk analysis Surveillance and pest status Market access Import & export Inspection & audit Emergency response Pest pathways

Welcome to the IPPC Plant Health Campus.

The IPPC Plant Health Campus is your portal to e-learning courses, guides and technical information focused on key phytosanitary systems.

The content is aimed at national plant protection organizations (NPPOs), NPPO staff, phytosanitary capacity evaluation (PCE) facilitators, plant health partners, stakeholders and students, with the overall goal of strengthening national phytosanitary capacity.

RESOURCES

Certified learning, recognized globally

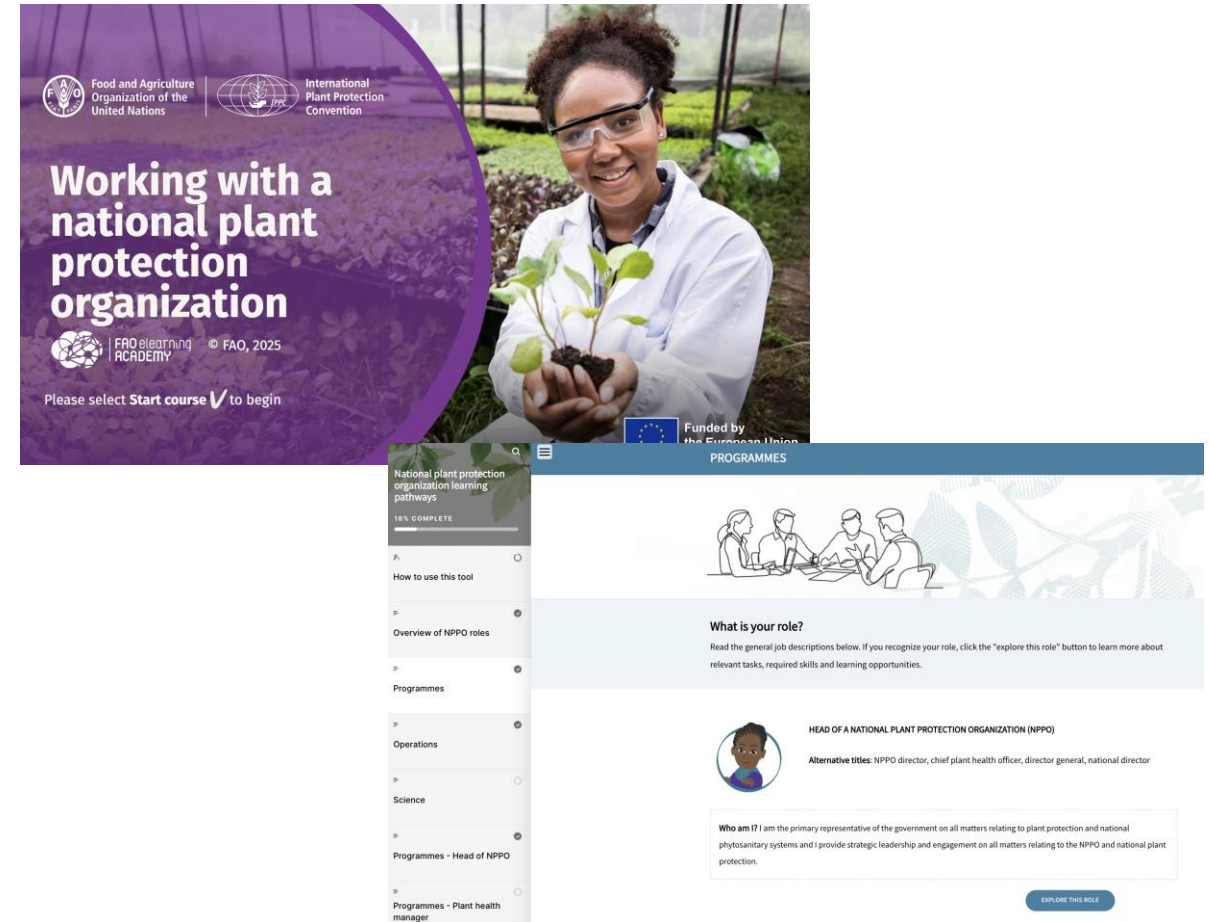

- 1 Upon completing a course, learners receive a **digital badge** or certificate.
- 2 Learners are encouraged to share badges on **LinkedIn and other platforms**, helping build a visible, global community.

Designed with the needs of plant health experts at its core

- E-learning courses and technical information on key phytosanitary systems
- Interactive learning pathways, tailored to the needs of national plant protection organization staff, allowing them to personalize their learning journeys
- Interactive simulation tool to practice concepts for preventing, preparing and responding to pest outbreaks

- Programmes - Head of NPPO
- Programmes - Plant health manager

What is your role?

Read the general job descriptions below. If you recognize your role, click the "explore this role" button to learn more about relevant tasks, required skills and learning opportunities.

HEAD OF A NATIONAL PLANT PROTECTION ORGANIZATION (NPPO)

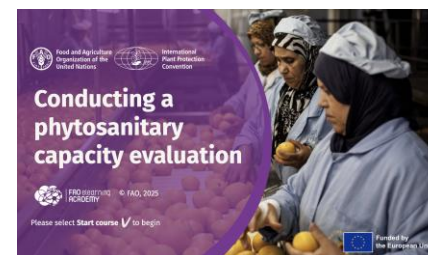

Alternative titles: NPPO director, chief plant health officer, director general, national director

Who am I? I am the primary representative of the government on all matters relating to plant protection and national phytosanitary systems and I provide strategic leadership and engagement on all matters relating to the NPPO and national plant protection.

Phytosanitary Inspection

INSPECCION SAG

Enrolment options

Phytosanitary Inspection

Estimated duration: 7h00

This e-learning course will introduce key concepts on Phytosanitary inspection and plant pests, import verification systems and methodologies for sampling consignments.

Pest Risk Analysis (Intermediate level)

Estimated duration: 5h00

The intermediate level of this course consists of three modules. Each module contains summary text along with some simple questions to measure your mastery of the subject. At the end of the intermediate level, a short test will be offered to you. Your results will determine your access to the advanced level.

First, we will review the international context of plant protection and the rights and responsibilities of importing and exporting countries. We highlight the roles of the International Plant Protection Convention, national and regional plant protection organisations, the WTO Agreement on SPS Measures, and international standard-setting.

Next, we focus on pest risk analysis (PRA) in more detail: its role and purpose; the concepts of risk, probability and impacts; information gathering and how to deal with uncertainty; and the importance of risk communication and transparency.

Finally, we will look at two specific illustrations: a pathway-initiated PRA and a pest-initiated PRA.

Designed to Support Both Self-Paced Learning and Structured Training Programmes

- **For plant health professionals:**
Complete courses anytime, anywhere — at your own pace
- **For national plant protection organizations (NPPOs):**
Easily integrate certified courses into staff training and capacity development programmes
- **For universities and academic institutions:**
Incorporate high-quality IPPC content into plant health and phytosanitary curricula
