FAO elearning Academy and alignment with SDG Agenda 2030

Cristina Petracchi

FAO elearning
ACADEMY

Challenges to which humanity is confronted

- Food Insecurity
- Food Losses and Food Waste
- Food Systems Sustainable inclusive, integrated, performant and for enhanced nutrition
- Climate Change, extreme weather events and natural disasters
- Governance of Tenure and Management of Natural Resources
- Gender inequalities and discrimination (access to food, education, financial resources, services, decision making)
- Child Labor and Youth unemployment
- Human and animal diseases

FAO elearning Academy

A broad offering of a unique series of courses

Food and Nutrition Security

Sustainable Development Goal Indicators

Gender

M&E and Impact Assessment

Climate Change

Nutrition and Food Systems

Responsible Governance of Tenure

Social Analysis

Trade, Markets & Investments

Child Labour

Communication

Information Management & Knowledge Sharing

A broad offering of a unique series of courses

Social Protection and Resilience

Agricultural Statistics

Rural Employment, Decent Work and Migration

Capacity Development

Right to food

Crop Improvement

Responsible Investment in Agriculture & and Food Systems

Humanitarian coordination

Food safety

Animal Production and Health

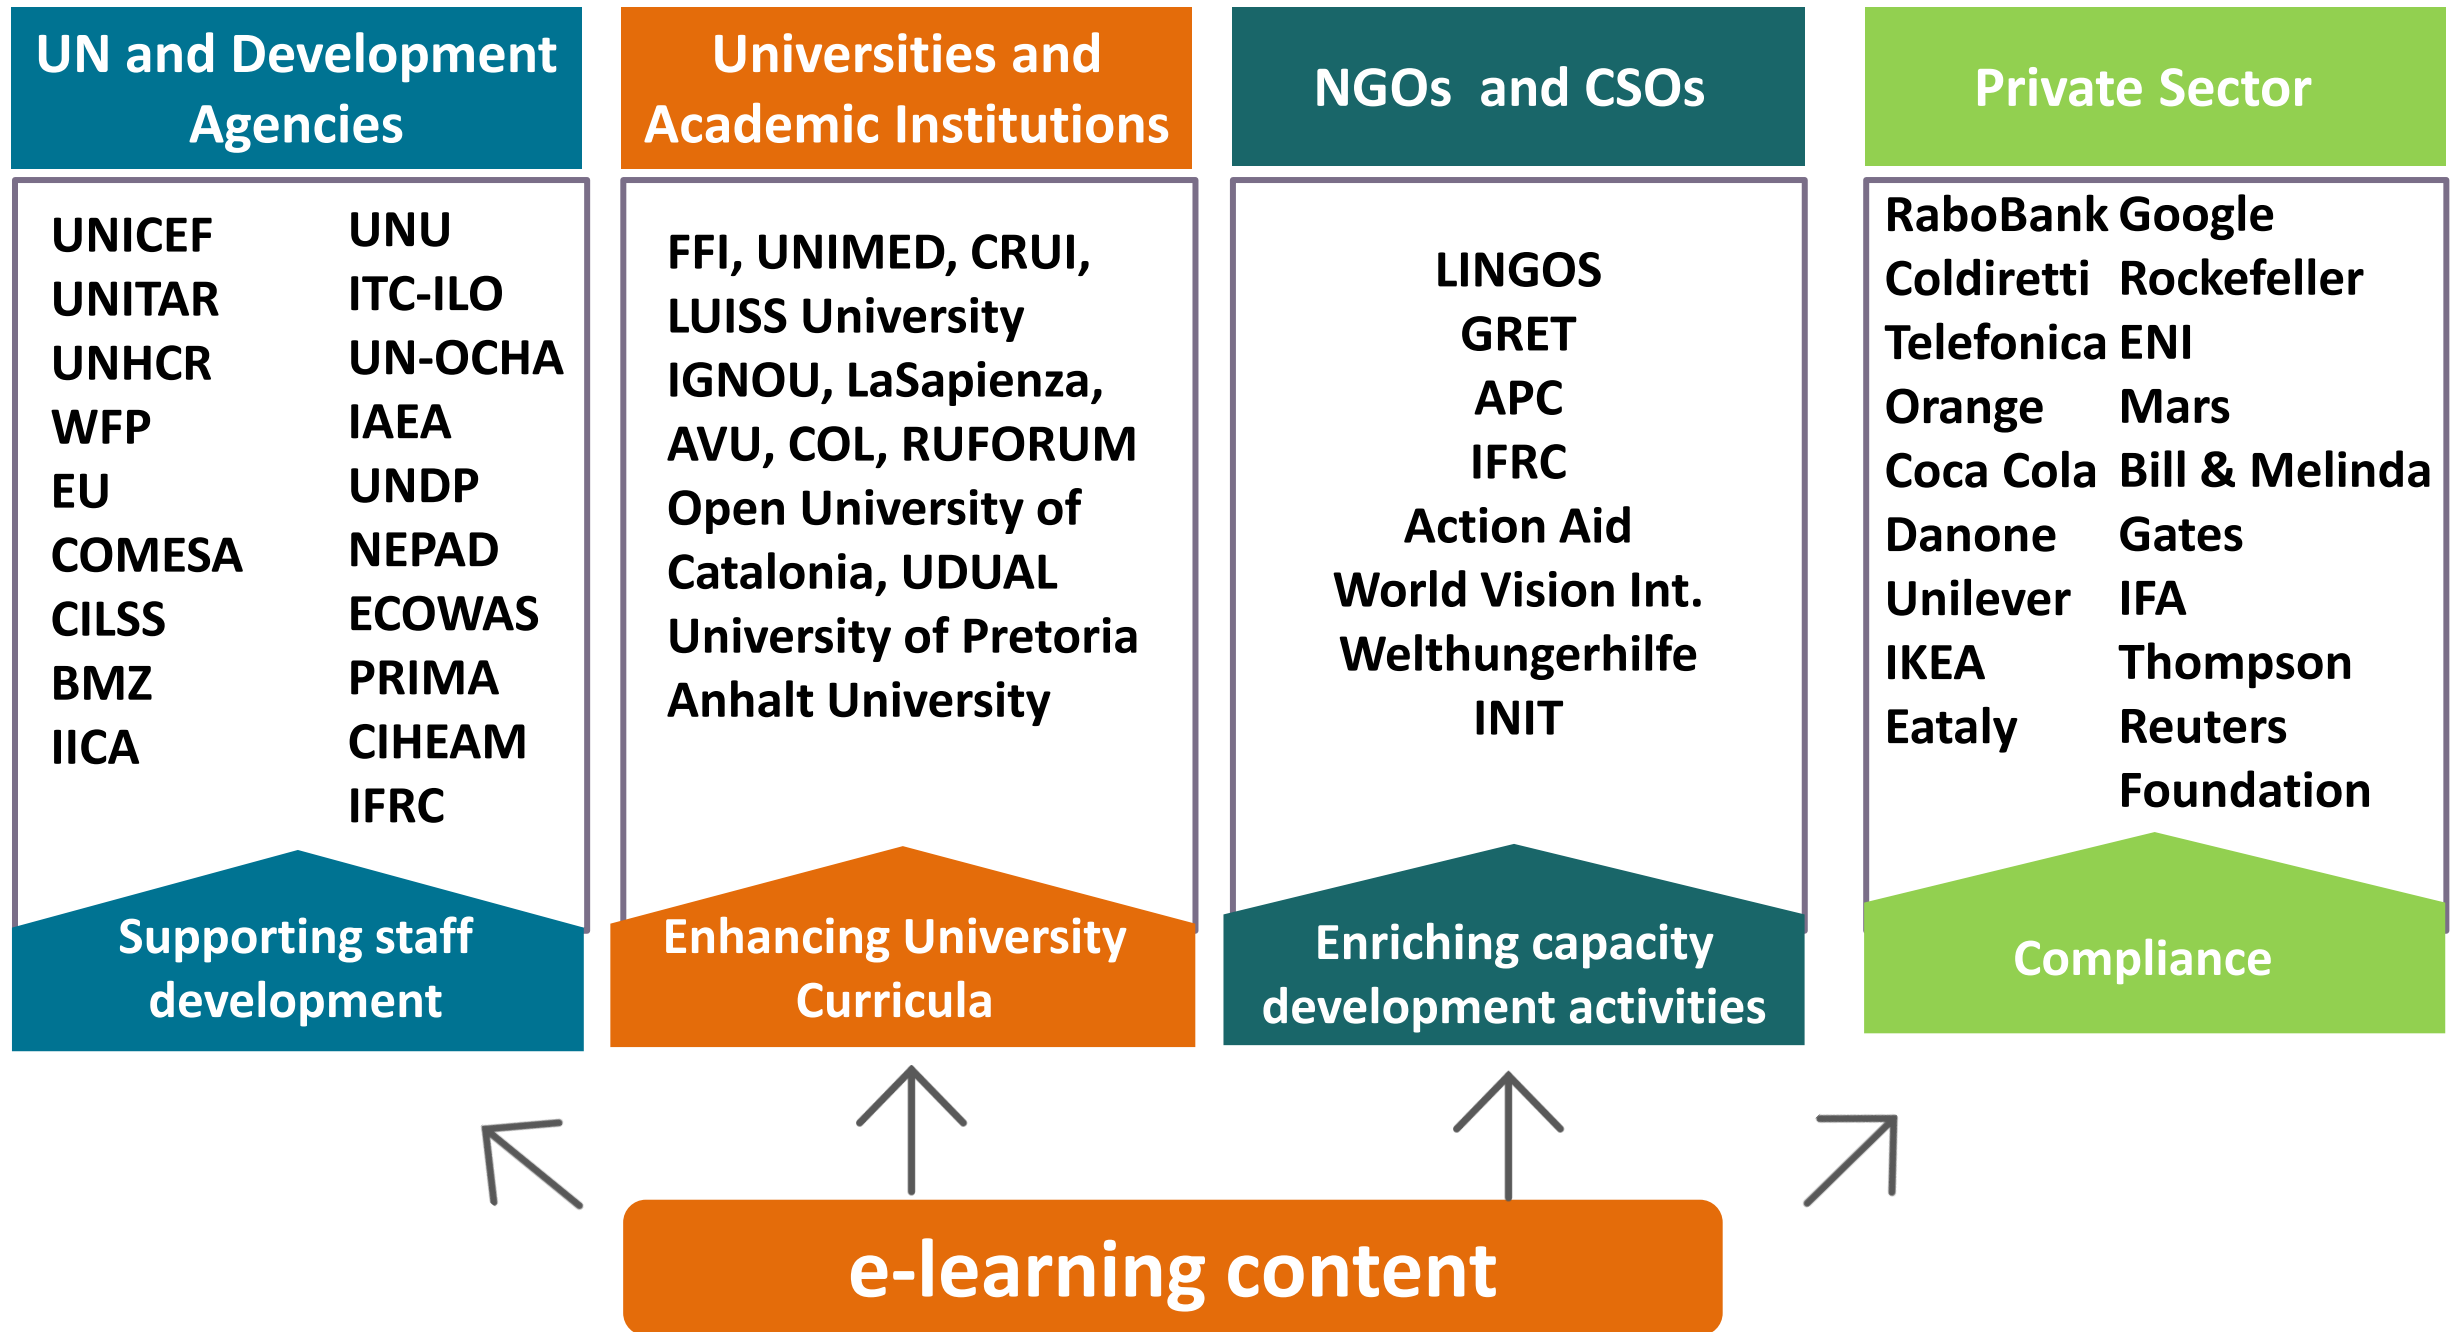

Geospatial data for Land Monitoring

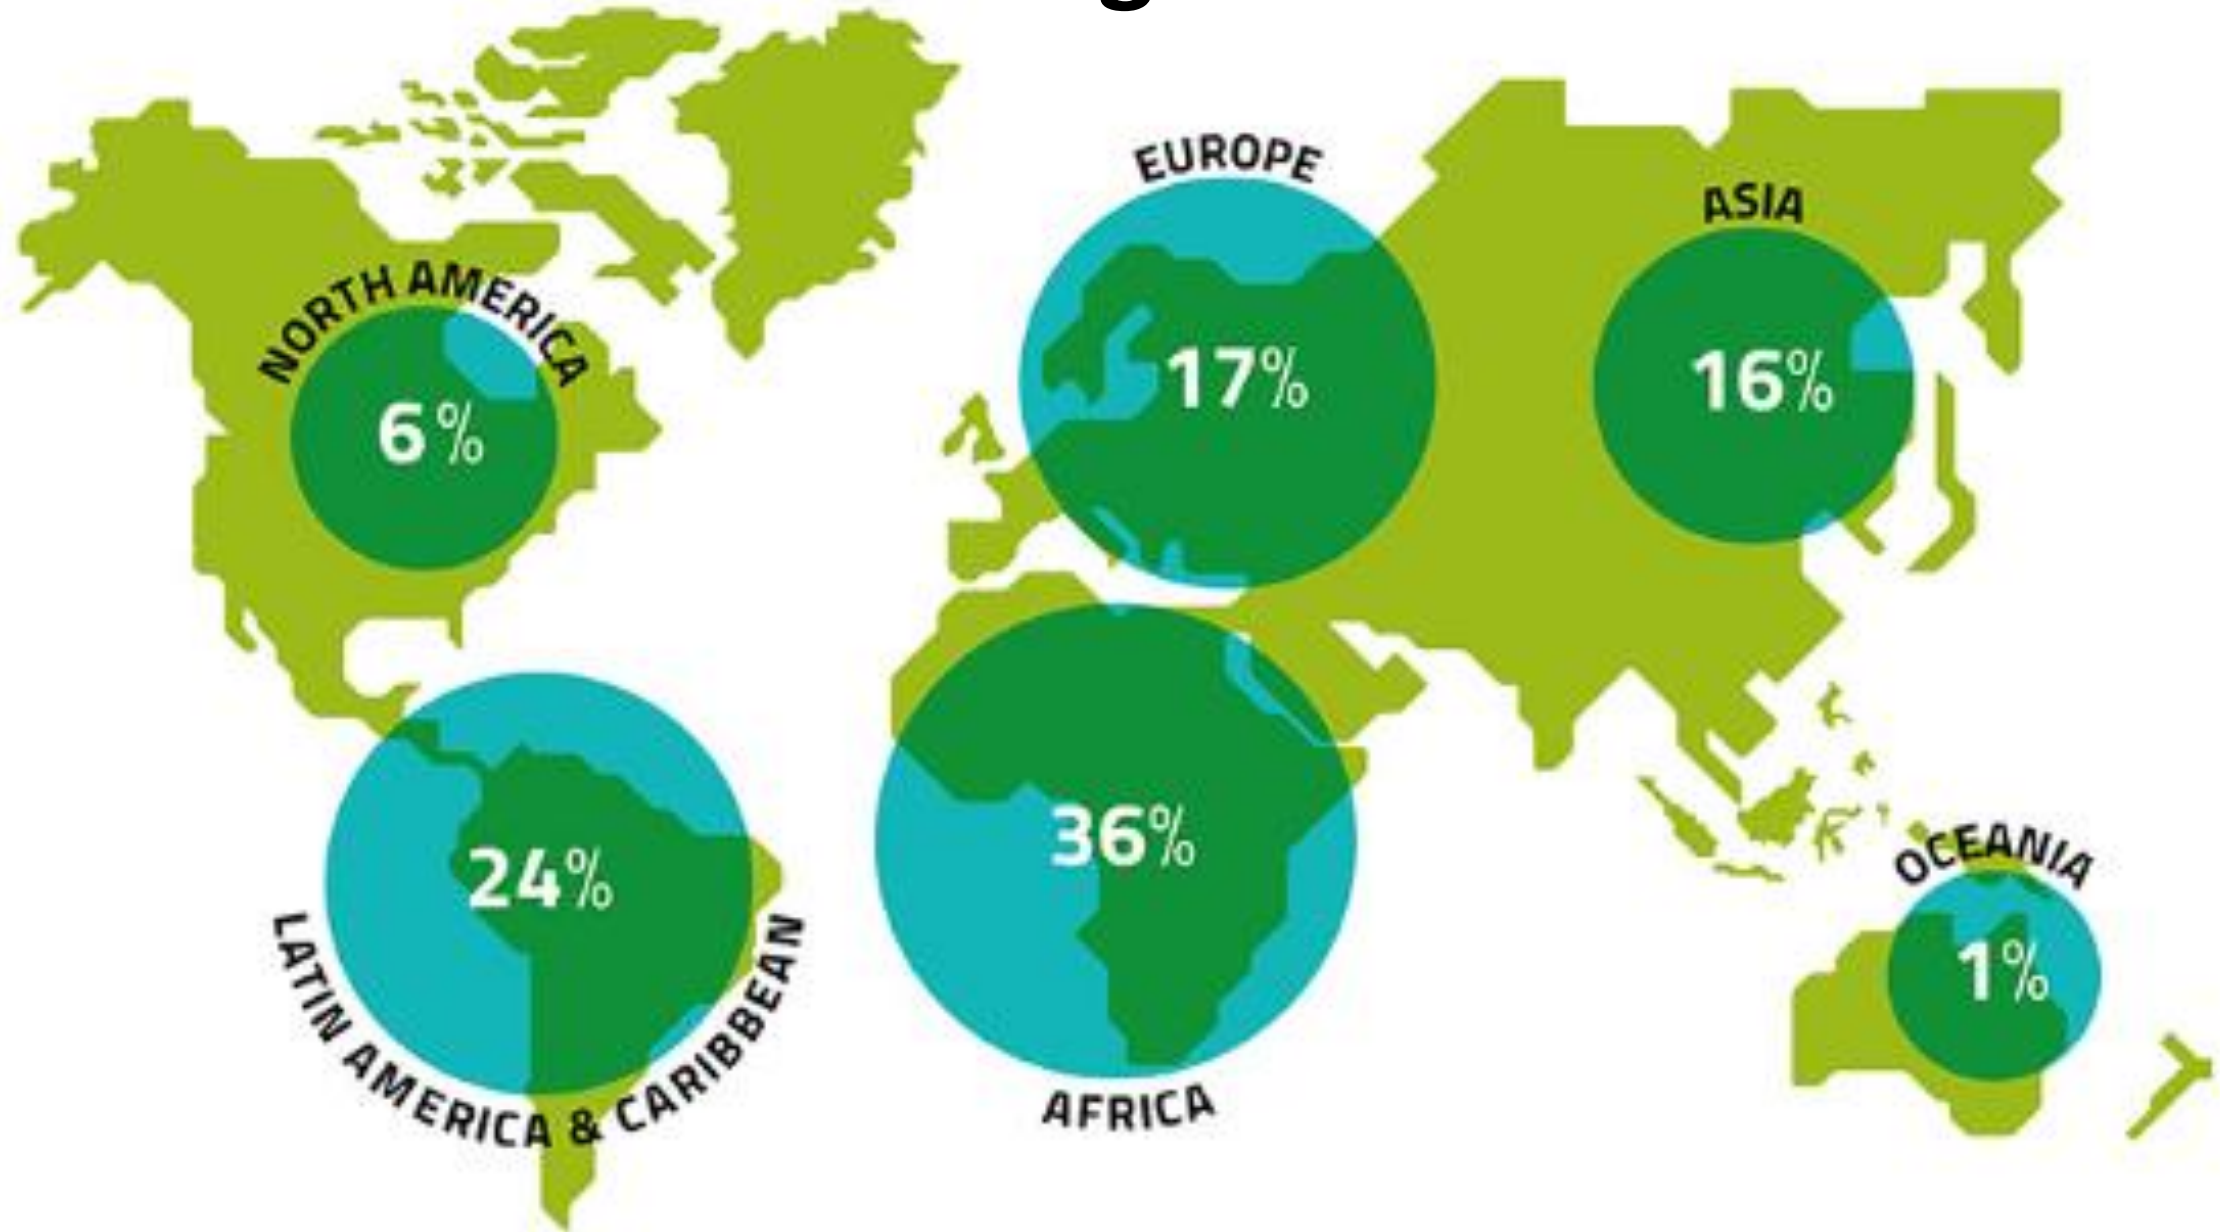

Understand Agricultural Risk Management & Resilience

Uptake, impact and scaling up capacity development for sustainability

FAO learners' regional distribution

FAO learners' affiliated institutions

Diversified Delivery Methods and Pedagogical Models

FAO SDG Indicators elearning courses

FAO SDG Indicators elearning courses

2.3.1 2.3.2

Productivity and income of small-scale food producers

2.5.1 2.5.2

Conservation of plant and animal genetic resources

14.4.1

Fish stocks sustainability

Other capacity development methodologies used for indicators:

14.6.1

Illegal, unreported and unregulated fishing

2.4.1

Agricultural sustainability

6.4.1

Water use efficiency

14.7.1

Value added of sustainable fisheries

15.4.2

Mountain Green Cover

12.3.1

Global food losses

15.1.1 15.2.1

Forest area and sustainable forest management

FAO elearning Academy Alignment with the Agenda 2030 for Sustainable Development

17 SDG goals

169 targets

230 indicators

21 SDG Indicators under
FAO custodianship

Monitoring the 2030 Agenda for

Learning Needs Assessment and Curriculum Design

To design an effective learning intervention you can adapt existing models to match your needs: **ADDIE** model.

A sound **preliminary analysis and needs assessment** is critical for any type of learning intervention.

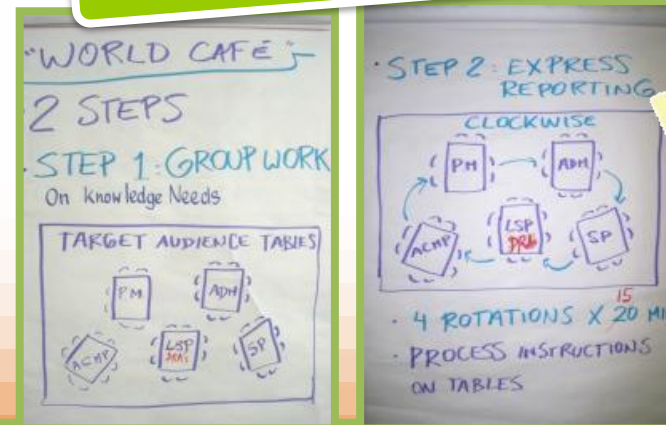

FAO: curriculum design collaborative process

Workshop participants include field practitioners and target audience representatives.

Participatory approach

World Café

learner-centered design

Job-oriented approach

Market Place

Who are the courses for? What competences are targeted?

Farmers, farmer organizations & communities

Policymakers, planners, & government officials

Service providers & intermediaries dealing with agricultural risk management services

Job Tasks

- Assess the risk, uncertainty events and contributing factors relevant to farm operations.
- Evaluate alternatives to reduce/mitigate risk including all available options/solutions both traditional and modern.
- Manage risk by adopting appropriate solutions, lobby and facilitate policy changes.

Competencies, skills and knowledge

- Identification and characterization of risks, including the probability of occurrence and consequences
- What is impact on farm income and food security
- Impact of risk on farmers' production, revenues and household security and national food security

Target Audience Analysis

Example: SDG Indicator 14.b.1 - Securing sustainable small-scale fisheries

Policy-makers or advisors, responsible for using the reported data to inform subsequent decisions on national policies and interventions.

National fisheries administration officials, responsible for supporting SSF data and information generation and sharing.

Small-scale fishing community members/organization, responsible for participating in management efforts.

Representatives from NGO, regional organization, academia/research, donor community, participating in the reporting process.

Job Tasks related to Indicator 14.b.1

- Gathering of sector-disaggregated SSF data
- Promoting the application of the SSF guidelines
- Supporting inclusion of women in policy dialogue

Knowledge, Skills and Competences

- Definition of SSF at national level
- SSF guidelines and related information needs
- Sector-disaggregated data collection methods (participatory)
- ...

Target Audience – Topic and Task Analysis

Who is our target audience?

- Professional profiles
- Roles
- Responsibilities

Audience	General areas of responsibility	Nutrition-related responsibilities
Policy formulators <ul style="list-style-type: none"> • Independent consultants • Government officials 	Responsible for: identification of needs and priorities in country/region, collaboration across ministries and sectors, drafting or revising policies coherent with national and global development agendas in-line to meet commitments and goals.	Identification of nutritional needs, preferences and emerging problems such as non-communicable diseases in the country/region, nutrition and dietary trends, collaboration across ministries and sectors, drafting or revising policies coherent with national and global nutrition-related frameworks in-line to meet nutrition commitments and goals.
Investment planners <ul style="list-style-type: none"> • Development partners • International consultants • Government officials 	Responsible for: assessment of needs and priorities in the country/region, investment design, collaboration across sectors and ministries matching policy objectives with funds, alignment with national policy framework, program review, and reporting.	Assessment of nutritional needs in the country/region, nutrition and dietary trends, nutrition-sensitive investment design, collaboration across sectors and ministries matching nutrition policy objectives with funds, alignment with national policy framework, program review, and reporting.
Project managers and designers <ul style="list-style-type: none"> • Development partners • Ministerial officers 	Responsible for: assessing local needs and capacities, program design, implementation, staff coordination and management, M&E, and impact assessment.	Assessment of local nutritional situation and needs, nutrition-sensitive program design, implementation, staff coordination and management, M&E, and nutrition impact assessment.

Topic and Task Analysis

What are the **job tasks** and **activities** the various target audience has to perform?

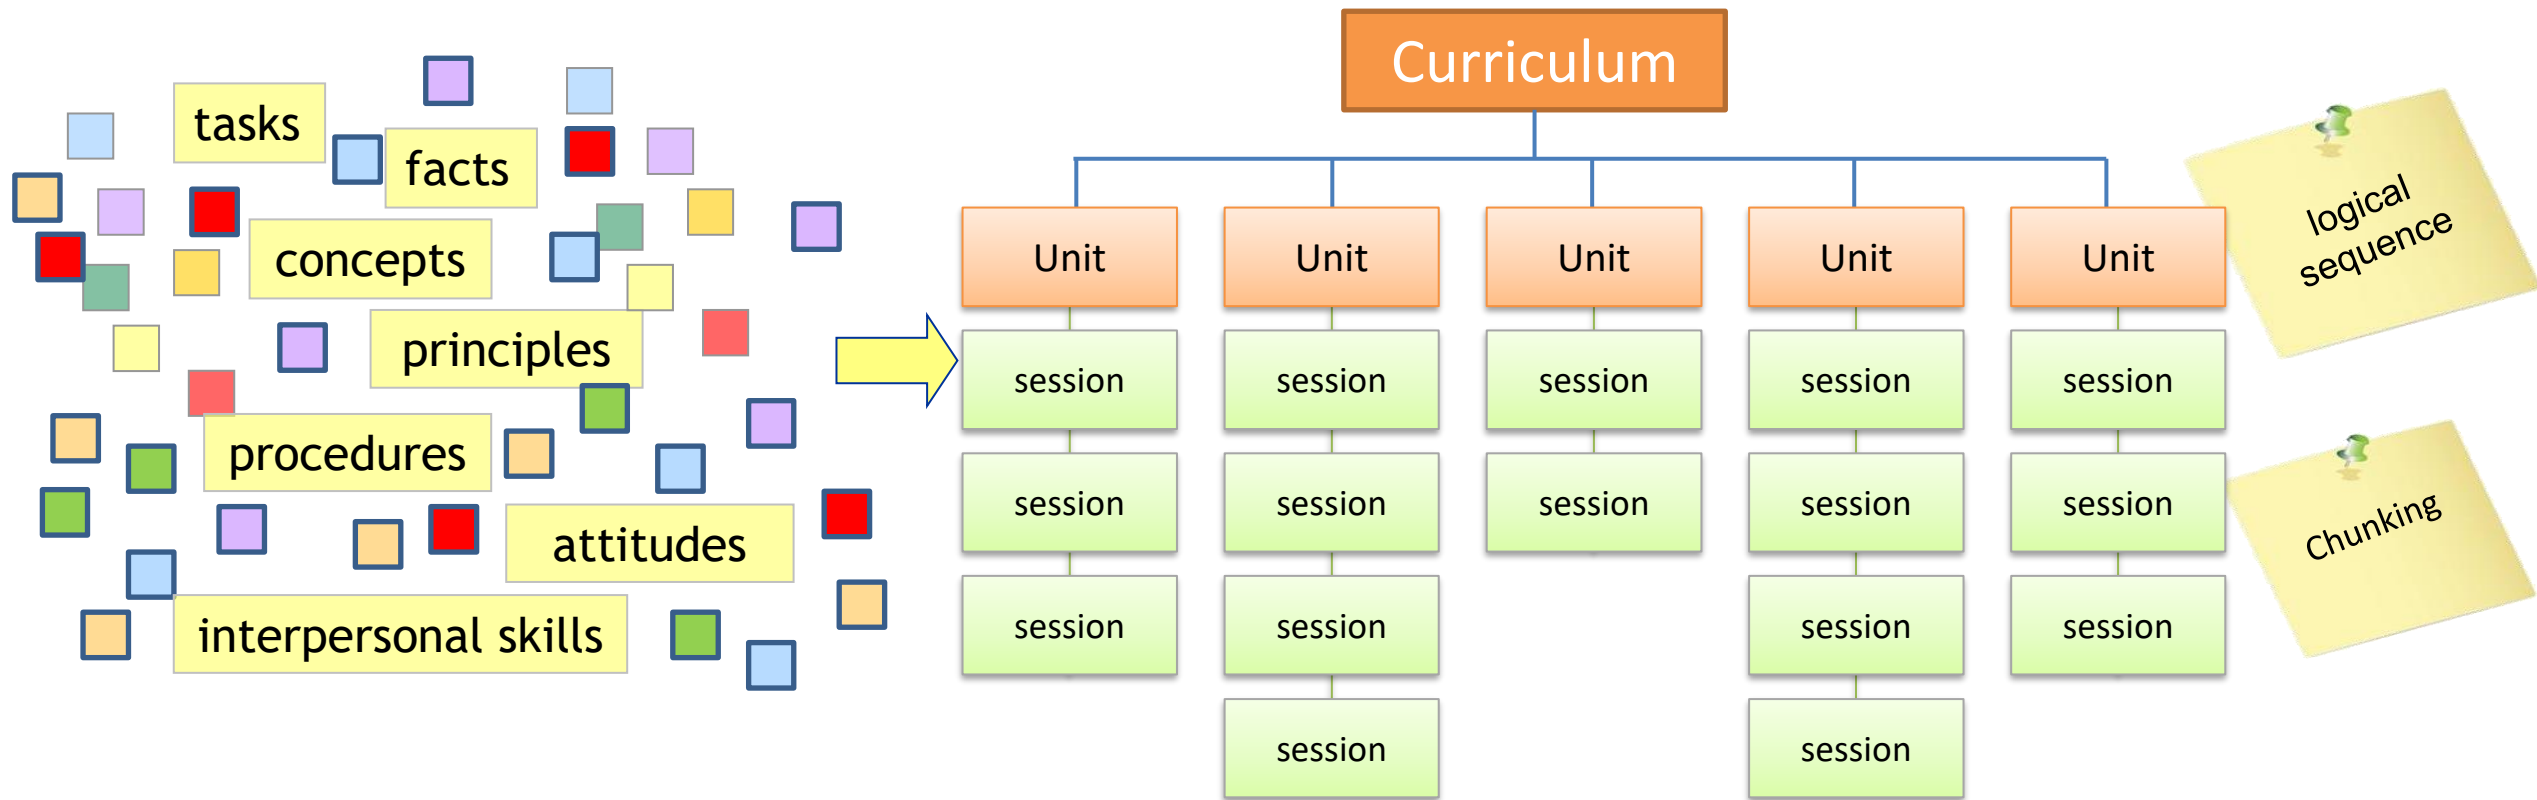

What are the **knowledge, skills** and **competences** they need to acquire to better perform their job tasks?

What are the competences we are targeting?

Functions	Activities	Knowledge/ Skills needed to perform activities
Function 1 – Assess political and nutrition context	<ul style="list-style-type: none"> Evidence-based assessment of nutrition situation Assess policy framework and align with national/global commitments and initiatives on nutrition Assess nutrition-enhancing good practices, what has been done before Collaborate across sectors and ministries for nutrition 	<p><u>Knowledge needs</u></p> <ul style="list-style-type: none"> Awareness of regional/national/global nutrition-related policy framework and initiatives Key notions of nutrition and its drivers to interpret nutrition information Where to access reliable secondary information on nutrition situation <p><u>Skills needed</u></p> <ul style="list-style-type: none"> Advocate - how to communicate key nutrition messages and priorities to various sectors (costs/benefits of enhancing nutrition) How to collaborate across Ministries and sectors (e.g. identify and/or establish nutrition governance mechanisms - which Ministry 'hosts' nutrition agenda; which collaboration mechanisms across ministries)
Function 2 – Formulate Policy	<ul style="list-style-type: none"> Identify priority actions based on gap analysis and set realistic nutrition-sensitive and specific objectives Ensure ownership of process across ministries Monitor dietary consumption patterns and access to safe, diverse, and nutritious foods Interpret results of M&E of interventions and translate into recommendations 	<p><u>Knowledge needs</u></p> <ul style="list-style-type: none"> What are (realistic) nutrition objectives given timeframe, budget, commitment Importance of monitoring and which measures to use Basic knowledge of impact pathways – both positive and negative (theory of change) and ways to mitigate harmful impacts <p><u>Skills needed</u></p> <ul style="list-style-type: none"> How to conduct gap analysis, situation assessment in different contexts How to interpret M&E findings How to create incentives for nutritious foods through production, trade, and distribution

Curriculum design: learning objectives and sequencing

Content is organized into a logical structure: **curriculum outline**, for the development of the content for the learning intervention.

The importance of identifying the type of content

Facts (Who? When? Where?)

For example

- Percentages
- Lists of existing data
- Dates and places

Concepts and Processes to understand (What is?)

For example

- Informal tenure rights
- The participatory process
- Potential impacts of natural disasters on recorded data

Principles and Procedures to apply (How to?)

For example

- Stakeholders analysis methodology
- How to identify potential beneficiaries
- Measures to support vulnerable and marginalized people

Content that can influence attitudes

For example

- Benefits of using a participatory approach
- Consequences of lack of transparency of a given process

Different learning strategies for each type of content

Blended learning Programmes

The learning programmes provided a continuous learning opportunity over several months using "**blended learning**".

The blended learning programmes consist of **4 main components:**

Learning needs
assessment

Online
collaborative
workshop

Face 2 face
workshop

Post-workshop
online
mentoring

Blended Learning Programmes

Food and Agriculture Organization
of the United Nations

Federal Ministry
of Food, Agriculture and
Consumer Protection

giz

Improving the abilities of Regional Organizations to
develop, implement and monitor food security
training programmes

The project has supported 3 regional organizations in designing, developing and delivering learning programmes to strengthen capacities of food security professionals in their member states.

**ASEAN - Association of Southeast Asian Nations
FSIS**

10 Countries:

Brunei Darussalam, Cambodia, Indonesia,
Laos, Malaysia, Myanmar, Philippines,
Singapore, Thailand, and Viet Nam

Blended Learning Programmes

Food and Agriculture Organization
of the United Nations

Federal Ministry
of Food, Agriculture and
Consumer Protection

giz

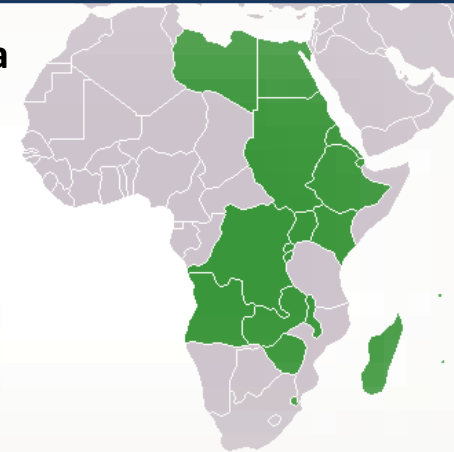

Improving the abilities of Regional Organizations to
develop, implement and monitor food security
training programmes

COMESA - Common Market for Eastern and Southern Africa

19 Countries:

Burundi, Comoros, Democratic Republic of the Congo,
Djibouti, Egypt, Eritrea, Ethiopia, Kenya, Libya, Madagascar,
Malawi, Mauritius, Rwanda, Seychelles, Sudan, Swaziland,
Uganda, Zambia and Zimbabwe

CILSS – Permanent Inter-State Committee for Drought Control in the Sahel

ECOWAS – Economic Community of West African States

17 Countries:

Benin, Burkina Faso, Cape Verde, Chad, Côte d'Ivoire,
Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali,
Mauritania, Niger, Nigeria, Senegal, Sierra Leone and Togo

Learning Programmes: Capacity Development intervention

Online workshop – collaborative learning

How is the course organized?

Click the boxes below to see what you will find in the next lessons.

How does the food system influence nutrition?

Making agriculture and food systems nutrition-sensitive: key principles

Making agriculture and food systems nutrition-sensitive: key interventions

A conducive international environment for nutrition

Enjoy the course!

Re: Discussion Forum Unit 1: CAADP implementation in your country by [Kondwani Gondwe](#) - Tuesday, 5 February 2013, 11:46 AM

Hi Everyone

Currently, Zambia is at **stage 8 - elaboration of detailed investment plan**. We have the Zero to input into the proposal.

The National Agriculture Investment Plan (NAIP) working to harmonise all agriculture stand alone

Expert-led Group Discussions

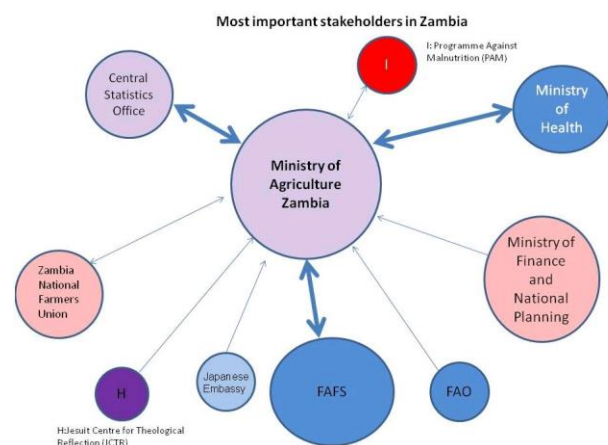

Re: Discussion Forum Unit 1: CAADP implementation in your country by [Sepiso Mate](#) - Tuesday, 5 February 2013, 11:51 AM

hi all,

- CAADP in Zambia is currently elaborating a detailed investment plan which is stage 8.
- the zero draft of the situation and proposed investment plan is already in place.
- cooperating partners, NGOs and the private sector meetings have been held to input into the
- the National Agriculture Investment Plan (NAIP) working to harmonise all agriculture sectors

Country Mapping Exercise

Name of Stakeholder/Organisation	Type of Stakeholder/Organisation	Kind of data concerning food security they collect	What kind of report do they publish
Ministry of Finance & National Planning	Public	Gross Domestic Product Contribution, Sector Growth	Country Economic Performance Report
Agribusiness & Marketing Department	Public	Agricultural Commodity Prices Agricultural Producer Prices (inputs)	Market Bulletins
National Food and Nutrition Commission	Autonomous body under Ministry of Health	-National Nutritional Status (statistics on stunting levels, micronutrient deficiencies) -Food consumption patterns	-Annual food and nutrition report - Nutrition Surveillance reports -Recommended daily food pyramids -Nutrition assessment reports
Food Reserve Agency	Autonomous body	Grain Reserves	Strategic Food Reserves for

Learning Programmes: Capacity Development intervention

Face-2-face workshop

Soft Skills (advocacy, facilitation)

Situation alimentaire et nutritionnelle dans mon pays

Tâche: Préparez une présentation sur la situation

- en tenant compte des cadres conceptuels
- en se basant sur le travail fait pendant la formation en ligne

30

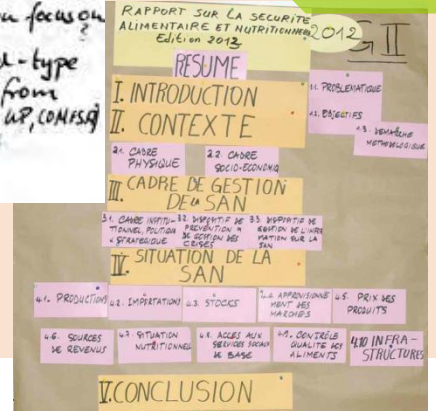

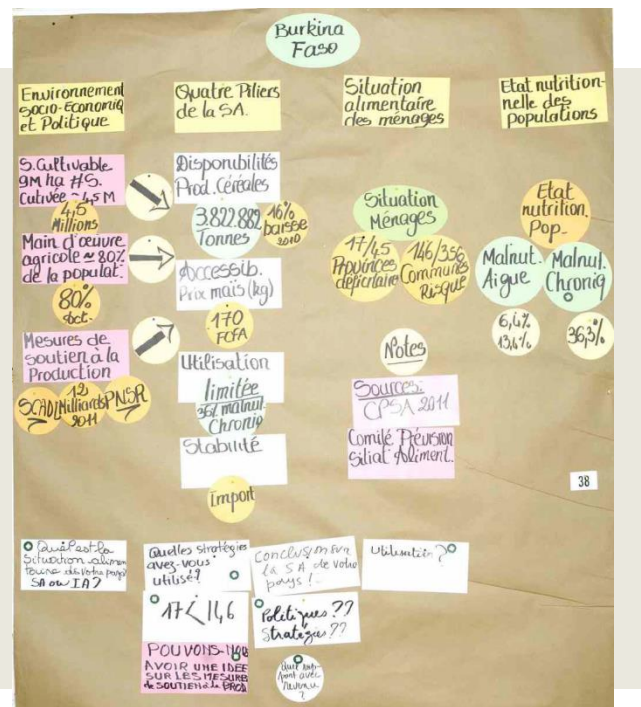

'Action Planning'

Please prepare in your country group a visualized presentation on:

- What are your concrete activities in the next months, in your CAADP country team? - what / - with whom / - how?
- 'back to office report': which 4 aspects do you focus on?
- Which support kind and -type do you favour/ foresee from whom? (colleagues here, UN, COMESA)

→ open questions!?

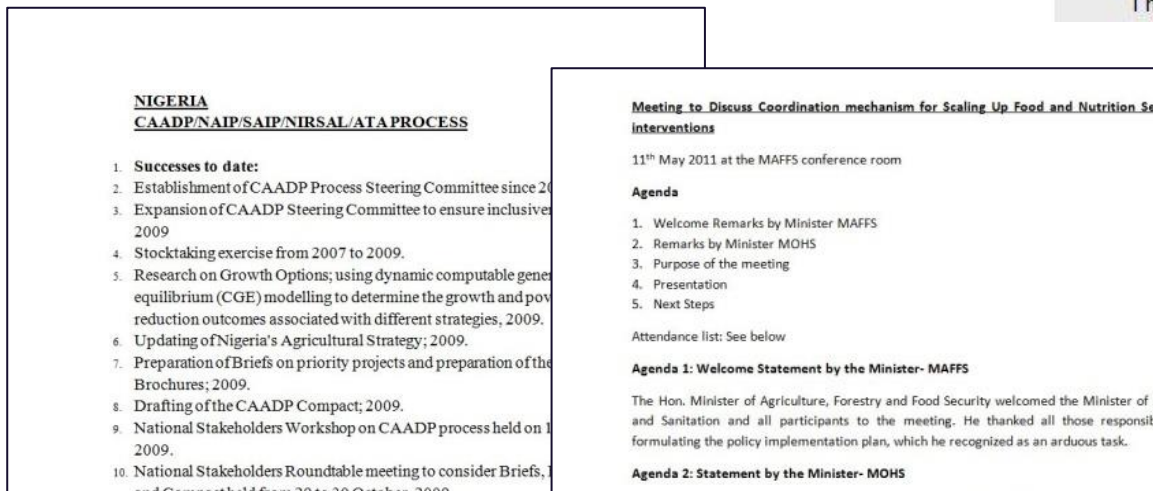

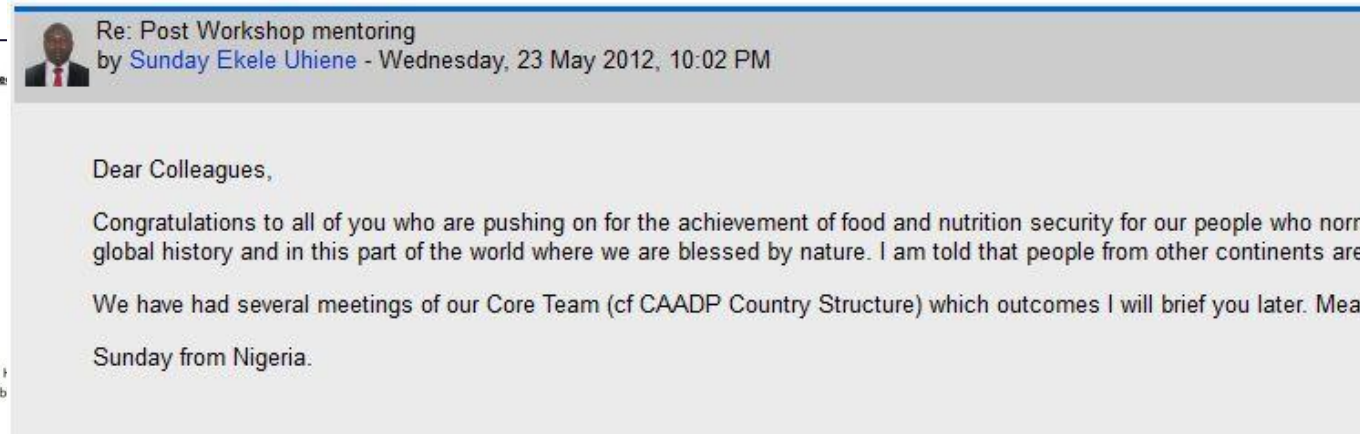

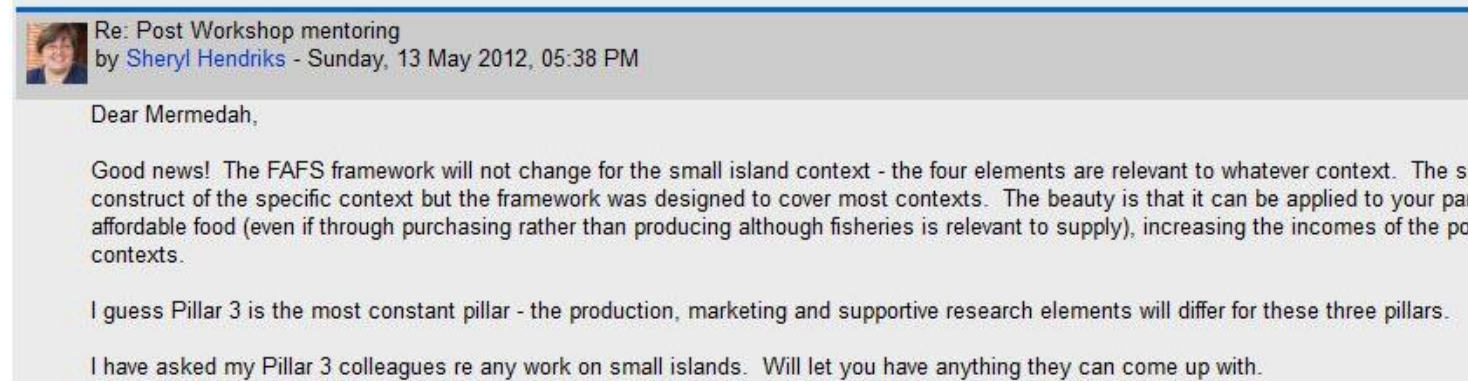

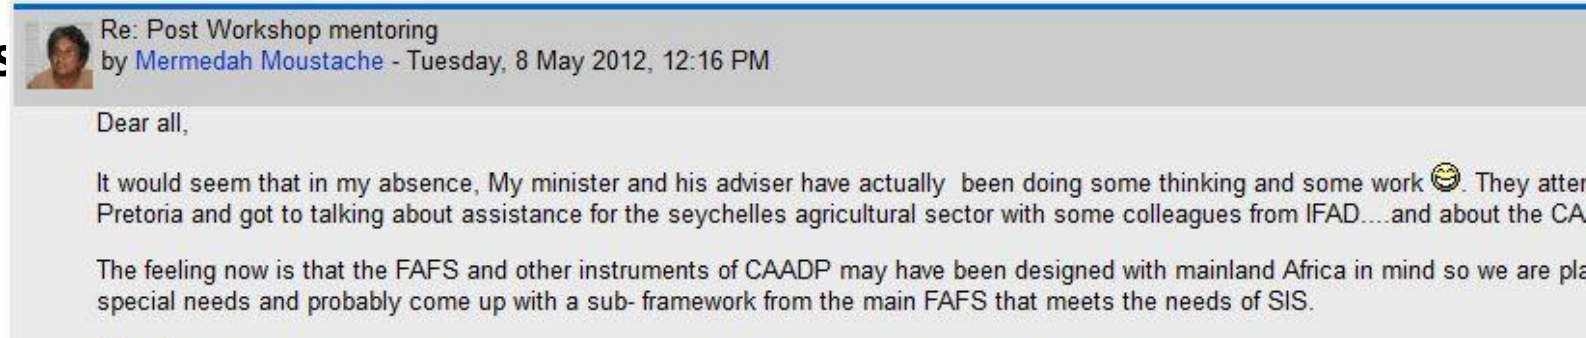

Action Planning and Reporting

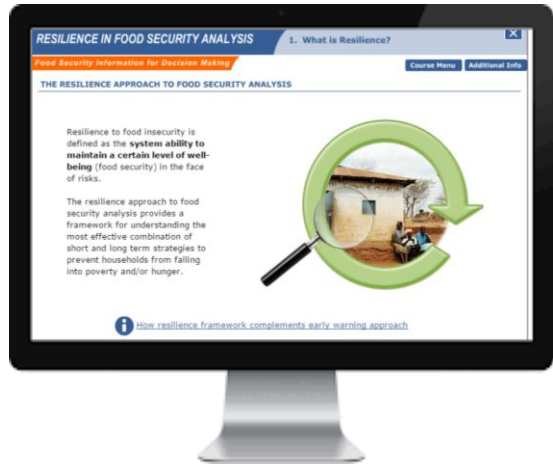

Country level FNS analysis

Post Workshop online mentoring: a continuous learning experience

- 3-months online mentoring by subject-matter experts provided **continuous support** after the face-to-face workshop
- **Guidance and follow-up** on action plans
- Participants **exchanged** experiences and reports with other countries

Mobile-based learning

FAO has started developing “responsive” e-learning courses which are accessible through computers, tablets and smart phones.

Mobile performance support tools

- help professionals involved in field-based activities
- quick access to hands-on information and guidance

Video-based learning

- series of videos for awareness, scenarios or techniques
- micro-learning nuggets, available through multiple devices

What are online badges?

- **Community approval** based on recognized competences and skills
- **New pathway of lifelong learning** separate from the traditional, formalized academic pathway
- Build pathways for individuals to work towards **learning goals**, provide **employment opportunities**
- **Progress talent** within organizations: new way to **identify talent** based on competency and attitude
- Better **match** individuals with non-traditional experiences to relevant **employment** opportunities.
- Motivate **engagement** and **collaboration**
- **Improve retention** and **flexibility** in skills development that are targeted
- Allow alternative way to get **validation for skills acquisition and achievements**.
- **Free and open** any organization can use this standard to create, issue and verify open digital badges.
- **Transferable**: collect badges from multiple sources, on and off line, into a backpack.
- Display your skills and achievements on **social networking profiles, job sites, e-portfolio, websites**.
- **Stackable** build upon each other and be stacked to describe professional
- **Evidence-based**: metadata that links back to the issuer, criteria and verifying evidence.

Private Sector: Industry uses digital badges to promote learning and to recognize employee skill development

Company	Type of learning accredited with badges	Examples	Audience	How employees are assessed
	<ul style="list-style-type: none"> Uses badges to drive interest in its blended learning program and to help demonstrate competency for workers completing the associated tasks An experiential learning approach was setup for individuals in sales 		<ul style="list-style-type: none"> Internal 	<ul style="list-style-type: none"> In person or virtual presentations shared with peers for feedback and with managers for coaching and final scoring
	<ul style="list-style-type: none"> IBM launched an external website in 2015 called cognitiveclass.ai/ where employees, or other interested parties, can take courses free of charge Individuals can work through courses like Big Data 101 or Machine Learning 101 and go on to earn an IBM badge 		<ul style="list-style-type: none"> Internal & External 	<ul style="list-style-type: none"> Several mechanisms: 700-plus single exam certifications
	<ul style="list-style-type: none"> Uses badges for its Dell EMC Proven Professional Program The badges contain metadata describing employees qualifications and credentials, including how they were earned 		<ul style="list-style-type: none"> Internal & External 	<ul style="list-style-type: none"> Online exams (through digital signature and picture control)
	<ul style="list-style-type: none"> Uses digital badges for credentials from its Oracle University collection, for IT certifications 		<ul style="list-style-type: none"> External 	<ul style="list-style-type: none"> Online or in-person exams
	<ul style="list-style-type: none"> Badges are part of the HPE Education services to help prove technology skills (big data, Cloud, Data Center, IT service management, Networking, Security, Storage, etc.) 		<ul style="list-style-type: none"> External 	<ul style="list-style-type: none"> Online learning courses
	<ul style="list-style-type: none"> Primary used at sales oriented topics and tools for employees 		<ul style="list-style-type: none"> Internal & External 	<ul style="list-style-type: none"> Online exams, course completion, completing specific tasks
	<ul style="list-style-type: none"> Provides badges for certifications, skills or achievements on IT solutions 		<ul style="list-style-type: none"> External 	<ul style="list-style-type: none"> Online exams, course completion, completing specific tasks

Adapting and coping

WHAT IS THE VALUE OF A DIGITAL BADGE?

It shows the world the knowledge and skills you demonstrated to achieve your certificate from a respected, credible source.

It helps you publicize your accomplishments on social media, on your website and in your email signature.

It demonstrates that your knowledge is up to date.

WHO WILL NOTICE?

Clients

Employers

Prospective clients

Colleagues
