

Instructions for running the course using a download version

The interactive version of the courses is available as **downloadable package** and **only** runs on Windows PC's and no additional software is needed.

By clicking on the "Download course" button, a zip file with the course will be download onto your PC.

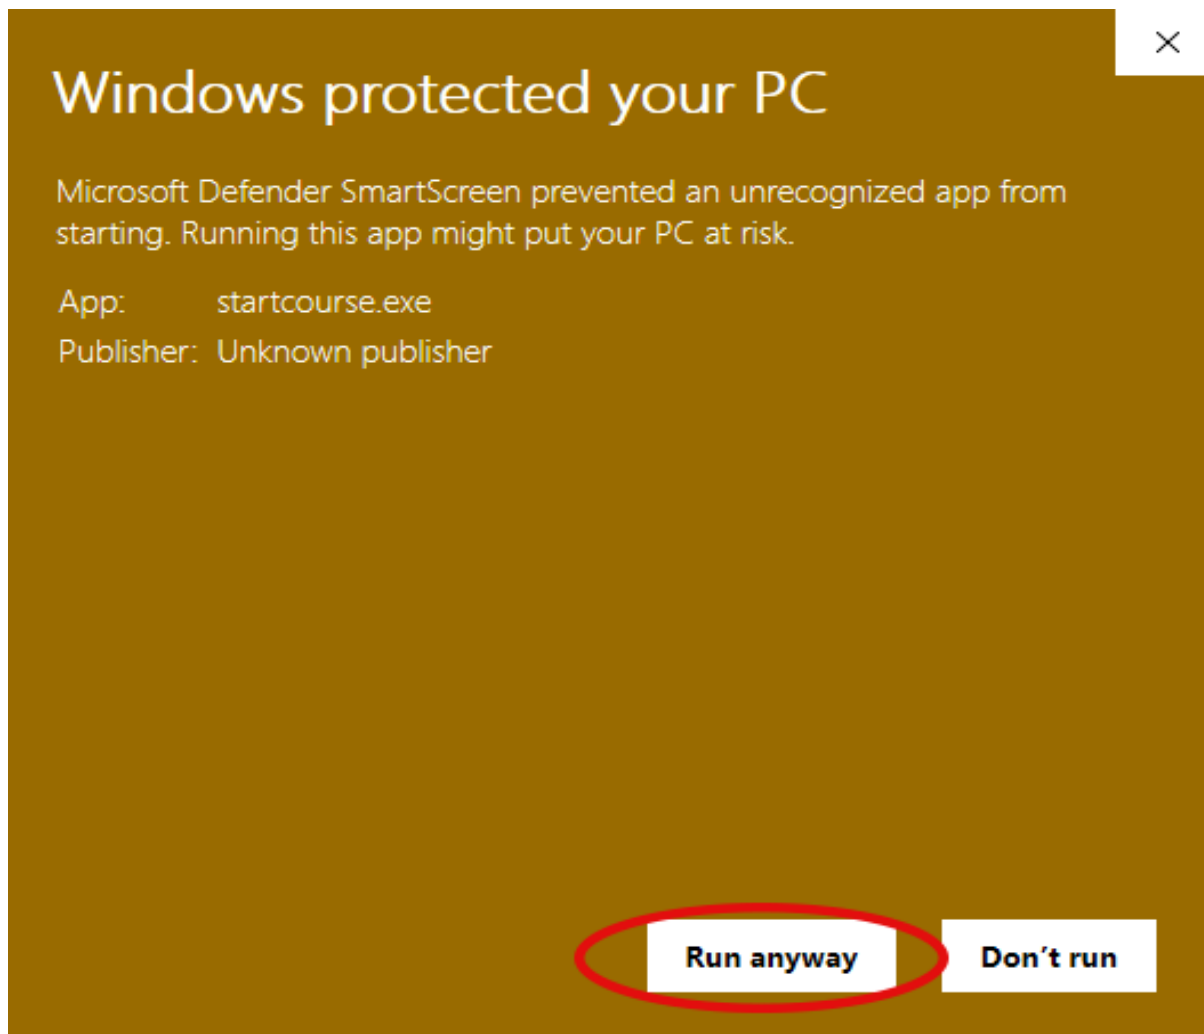

To access the course, you first will need to unzip this file. This will create a folder with the course. Please go into the folder structure and click on the "startcourse.exe" file. This should start the course.

On some windows platforms (mainly on Windows 10) you may receive the following message:

Please click on the More info link.

This will change the window as follows:

To run the course, you have to click on the “Run anyway” button.

Please note that depending on your system it may take some time (up to 30 seconds) before the course shows.

Enjoy the course!
