Invitation to international technical webinar

26 May 2021 | 14:30 - 16:00 (Rome time)

Why develop capacities on risk management in agriculture?

BACKGROUND

This international technical webinar is part of the series organized by the FAO elearning Academy, Agreenium (French training and research alliance for agriculture, food, environment and global health), UN-ESCAP (United Nations Economic and Social Commission for Asia and the Pacific), and Future Food Institute. This webinar is also part of the series Bridging the knowledge gap on the holistic risk management approach in developing countries, organized together with Platform for Agricultural Risk Management (PARM) and the Forum for Agricultural Risk Management in Development (FARM-D) - which are hosted by the International Fund for Agricultural Development (IFAD).

These webinars are an opportunity for all of us to share experiences and lessons learnt, discuss challenges, and propose innovative solutions and models. They aim to provide a holistic and comprehensive view of current trends in thematic areas related to global challenges, by combining development research and innovation perspectives.

The main objective of these technical webinars is to give practitioners the opportunity to interact with international experts, United Nations officers, University professors, researchers and fellow participants,
throughout the world. Webinars can be attended as interactive online sessions on Zoom, where sharing perspectives and asking questions to experts is encouraged. These sessions are also recorded and therefore available at any time, through the FAO elearning Academy: elearning.fao.org.

This webinar will host a panel discussion on the importance to develop and strengthen capacities to understand the risk environment in agriculture, through practical examples and highlighting challenges. The event will also spotlight the leading approach to manage risks in a given context, which encompasses a holistic methodology, that has grounded the series of four elearning courses on agricultural risk management (ARM) developed by PARM and the FAO elearning Academy, in partnership with IFAD and NEPAD. This first webinar will cover the first two elearning courses, which focus respectively on understanding and assessing risks in agriculture.

OBJECTIVES OF THIS SESSION

- Raise awareness on the importance of ARM;
- Demonstrate the benefits of adopting a holistic and integrated risk management approach and strategy;
- Share experiences on capacity development activities for managing agricultural risks.

SPEAKERS

This technical webinar will be delivered by Ms Cristina Petracchi (Leader of the FAO elearning Academy), Mr Kisan Gunjal (FAO), Ms Mariam Sow Soumaré, Mr Richard Miiro (Makerere University, Uganda), Mr Massimo Giovanola (PARM/IFAD), and moderated by Mr Gideon Onumah (NRI).

Dr Kisan Gunjal has been working as Senior International Consultant for IFAD, FAO, and WFP. Some of the high-profile assignments that Cristina Petracchi heads the FAO elearning Academy. She manages and coordinates the design, development, delivery and Dr Gideon Onumah is a Principal Economist in the Food and Markets Department of the Natural Resources Institute (NRI), where he
he covered include - food security implications of Ebola, the impact of El Niño, development of four e-learning courses on Agricultural Risk Management (ARM) for FAO/IFAD, and support in the preparation of ECA Regional SOFI 2020. He is currently working with FAO-RAF on impact of COVID-19 on Africa, and Risk Mapping in Africa for ARM. He also worked as a Consultant with the World Bank on Ethiopia and Mongolia. Kisan leads the NGO iREAMDev-Canada and India and is considered a leading authority on global food security. He taught at McGill University, Montreal, Canada, for 20 years and served as Food Security Economist for FAO’s Global Information and Early Warning System for 12 years.

language adaptations of an extensive portfolio of elearning courses and blended learning programmes for the benefit of FAO member countries and is responsible for the creation of University Masters' and Post Graduate Degree Programmes. She engages actively in consolidating partnerships across United Nations agencies, academic institutions and universities, regional organizations, CSOs and NGOs, for capacity development initiatives. In addition to a University Degree in Biological Sciences, Ms Petracchi holds a PhD in Nutrition and Food Science, and has several years of experience of capacity development activities in several countries.

has been for over 20 years, having also actively collaborated with PARM through research and capacity development activities. His main practice area includes agricultural marketing, rural/agricultural/SME finance and risk management in agricultural value chains. He is a leading global authority in researching, piloting and promoting uptake of structured agricultural marketing and financing systems in developing countries. Gideon has undertaken research/development advisory services for governments, donor agencies, NGOs and the private sector in Africa, Asia and Europe. He has been actively engaged in projects that foster upscaling of technologies to boost productivity and/or reduce waste and losses in agricultural value chains across Africa.

Richard Miiro is a Senior Lecturer in the Department of Extension and Innovations Studies, College of Agricultural and Environmental Sciences, Makerere University.

Mariam Sow is an Agricultural Economist with 30 years of experience in food insecurity risk management and resilience.

Massimo Giovanola is the Lead Technical Specialist for the Platform for Agricultural Risk Management (PARM) at the IFAD.
Sciences at Makerere University, Uganda. He is passionate about research and innovations that solve challenges in Agricultural development using a system view. As an experienced researcher, academic, trainer and facilitator of change processes, he has worked with farmers’ organizations, innovation platforms, gender transformative processes, return on training investment research, and training targeting agricultural researchers, and research managers in Sub-Saharan Africa and beyond. He co-organized the HARM training with PARM in Uganda. In 2021, he is poised to train internationally on gender responsive and resilience plant breeding for climate smart agriculture.

International Fund for Agricultural Development (IFAD). He is responsible for managing the PARM process in eight African countries. He works to define the appropriate strategies with the host governments and then guides the organization and implementation of technical studies on subjects such as country profiling, risk management and feasibility. He also develops and maintains partnerships with national and international stakeholders and partner organizations.
