Invitation to international technical webinar

13 October 2021 | 14:30 - 16:00 (Rome time)

How to strengthen the capacity to manage risks in agriculture: Experiences from practice

BACKGROUND

This international technical webinar is part of the series organized by the FAO elearning Academy, Agreenium (French training and research alliance for agriculture, food, environment and global health), UN-ESCAP (United Nations Economic and Social Commission for Asia and the Pacific), and Future Food Institute. This webinar is also part of the series Bridging the knowledge gap on the holistic risk management approach in developing countries, organized together with the Platform for Agricultural Risk Management (PARM) and the Forum for Agricultural Risk Management in Development (FARM-D) - which are hosted by the International Fund for Agricultural Development (IFAD).

These webinars are an opportunity for all of us to share experiences and lessons learnt, discuss challenges, and propose innovative solutions and models. They aim to provide a holistic and comprehensive view of current trends in thematic areas related to global challenges, by combining development research and innovation perspectives.

The main objective of these technical webinars is to give practitioners the opportunity to interact with international experts, United Nations officers, University professors, researchers and fellow participants,
throughout the world. Webinars can be attended as interactive online sessions on Zoom, where sharing perspectives and asking questions to experts is encouraged. These sessions are also recorded and therefore available at any time, through the FAO elearning Academy: elearning.fao.org.

Building on the previous session, this webinar will further expand on the crucial role of capacity development for agricultural risk management. The event benefits from the key lessons drawn from the series of four e-learning courses on agricultural risk management (ARM) developed by PARM and FAO elearning Academy, in partnership with IFAD and NEPAD. The discussion will start with a first overview on the different tools and strategies available to manage risk in agriculture and how to select the most appropriate one based on the context and target groups. The exchange will continue with how different organizations and stakeholders work on strengthening their capacity, capitalizing on their experiences at the regional and global level.

OBJECTIVES OF THIS SESSION

- Provide an overview of strategies and tools to manage risk in agriculture, and how to select them;
- Explain the role of key stakeholders in the formulation and implementation of empowering strategies;
- Present different designs and modalities for strengthening ARM capacity at different levels.

SPEAKERS

This technical webinar will be delivered by Ms Cristina Petracchi (Leader of the FAO elearning Academy), Mr Kisan Gunjal (FAO), Mr Samson Eshetu (AFAAS), Ms Muriel Mambrini-Doudet (INRAE), Mr Moussa Waongo (AGRHYMET Regional Centre), and moderated by Mr Carlos Enrique Arce (PARM).

Dr Kisan Gunjal has been working as Senior International Consultant for IFAD, FAO, and WFP. Some of the high-profile assignments that he covered include - food security

Dr Cristina Petracchi heads the FAO elearning Academy. She manages and coordinates the design, development, delivery and language adaptations of an

Dr Carlos Enrique Arce is a lawyer and development economist with over 25 years of experience in doing analytical and operational work in the area of agricultural risk
Samson Eshetu (PhD)
Capacity and Institutional Development Specialist
African Forum for Agricultural Advisory Services (AFAAS)

Muriel Mambrini Doudet
Senior Advisor to the Scientific Director in charge of Agriculture
INRAE

Moussa Waongo
Researcher and Head of the Agrometeorology training programme
AGRHYMET Regional Centre

Dr Samson Eshetu is a development professional with proven experience in areas such as food and nutrition security and livelihood. As an agricultural extensionist, he participated in the preparation of the SOFI 2020 report and worked with various organizations to develop e-learning courses on Agricultural Risk Management (ARM) for FAO/IFAD. He has been working with FAO-RAF on the impact of COVID-19 on Africa and Risk Mapping in Africa for ARM. Kisan leads the NGO iREAMDev-Canada and India and is considered a leading authority on global food security. He taught at McGill University, Montreal, Canada, for 20 years and served as Food Security Economist for FAO’s Global Information and Early Warning System for 12 years.

Dr Muriel Mambrini Doudet is Research Director at the board of the French Institute for Research in Agriculture, Food and Environment (INRAE). She is also developing a think tank for the management, mitigation and adaptation to climate change, and agricultural supply chains resilience. Carlos has authored and/or co-authored in various World Bank publications addressing the conceptual framework for agricultural risk management, designing and delivering training, and has participated in various countries in Sub-Saharan Africa and Latin America in leading risk management assessments at sector and supply chain levels. Currently, retired from the World Bank, he works as a Senior Consultant focused on grounding agricultural risk management into policies, strategies, and investments in developing countries.

Dr Moussa Waongo is an agrometeorologist with more than 10 years of experience. He is currently a researcher and head of the agrometeorology training programme at the AGRHYMET Regional Centre.
several international meetings, workshops, and conferences. He has conducted different research, training, and consultancy works with various local and international organizations, and published his works in journals and books. Currently, he is working for the African Forum for Agricultural Advisory Services (AFAAS) as Capacity and Institutional Development Specialist. He was also providing technical support for the PARM Ethiopia team on Capacity Development for ARM as Lead Learning Facilitator for the joint Regional Learning Events organized by AFAAS and PARM Ethiopia in the three regions (Afar, Amhara and Oromia) in Ethiopia.

major stakeholders of the French agriculture innovation ecosystem (GIS Relance Agronomique), currently working on new terms of the social contract of agriculture. She is the Director of the doctoral school of the Center of Research and Interdisciplinarity and invited scientist at the Chair for Design theory and methods. She headed the largest research center at INRAE, and was the Director of the Institute of Advanced Study for Science and Technology. Her background is in livestock nutrition and genetics. She is currently grounding a “Science of science management”. She has authored more than 70 international publications and books in the diverse academic fields that she merges.

Regional Centre. His main interests are climate prediction, climate variability and climate change impact studies on agricultural production. He has conducted studies in the West African region on the added value of seasonal climate forecasts, improved water management in agriculture and the impact of climate change on crop yields.

HOW TO ATTEND

The webinar is free and open to everyone, provided you have the link to the platform. To join the webinar session on Zoom, kindly register here.

We suggest you to use Google Chrome in order to join the webinar. We also recommend you to check your time zone here.

Please feel free to share this invitation with your colleagues.
